

Lower Elementary January Newsletter

Welcome back. I hope everyone had a great break. We will be jumping back into action and adding some new lessons in the class. In science this month we will be discovering Earth and all its glory. What makes the Earth and how it works. We will be learning some about the compass and testing how they work on the playground. Geography it is North America this month. For forth grade there will be research and questions due by the end of the month (class time will be given). Math we will be diving into multiplication for the 3rd and 4th graders. This month is going to go fast with all the fun and feeling fresh from the break. Each child will have one snack day each month. I will take care of any additional days needed for the month. Please try to bring your snack in towards the beginning of the month to ensure that there is a snack for your child's day.

Please be sure your child has a refillable water cup with them at the school each day. There are many of the kids that do not have one.
